High speed camera – when reliability is the priority

The only high-speed camera in the world designed for working in real clinical conditions, with perfect quality of *slow-motion records of real phonatory vibrations* in nearly any patient.

- ✓ **Automatic or manual focusing** for easy examination and acquiring perfect images.
- ✓ Easy and quick **kymographic analysis** in any case, capability of parametric assessment, “visual” jitter and shimmer.
- ✓ **HD mode** with vascular contrast option enables precise assessment of the entire larynx.
- ✓ **Swappable endoscopic optics**
- ✓ Fully integrated with **DiagnoScope Specialist** software
